

THE VOID

The Choice is Yours.

Press the Reset Button and the title screen for The Void: Centauri Conflict will appear on your TV. Use Keypad to select One Player or Two Player game options.

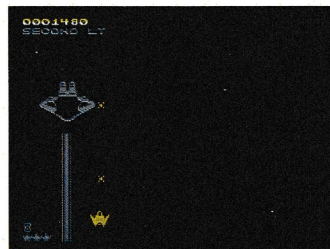

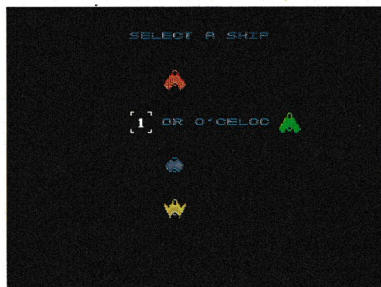

Choose one space ship from the four following selections. Through game play you'll discover the unique features, weapons and defenses of each ship. Use the following guide to assist your selection:

Daisy: She's fast and maneuverable. Her special weapons will obliterate enemies with one shot!

Dr O'Celoc. What a great ship. Fire and forget is the special weapon of Dr O'Celoc.

ADAM. Slow and powerful as she goes. A deployable shield will bail you out of any situation.

Illusion. Strength through balance. Illusion will unleash a ray of destruction to clear your path.

Fire Away!

After selecting your ship, it is time to push those aliens back into The Void. Use your ship's primary weapons to destroy the attacking alien ships and other objects you encounter. Occasionally a destroyed ship will release a Power Canister. Carefully fly over these canisters to pick them up. Power Canisters energize your ship's special weapons. Use your special weapons to gain advantage and win the engagement.

Ranking Up!

Through superb game play you will be awarded a higher rank and receive additional ships. Hey Space Cadet, are you good enough to make Fleet Admiral?

The Alien Command!

These aliens sure are tough but perhaps there is something bigger out there controlling them all? If you can find and defeat the formidable alien command ships you're on your way to securing the perimeter of The Void along your section of the Centauri Sector.
