HERE'S HOW TO PLAY

Control your Battlestar.

This is your first mission, Cadet. Test your nerve in controlling the mighty Battlestar. Push the Thrust Stick to rise away from the alien-infested planet. Your Battlestar moves in the direction its weapon faces. Skim the planet's surface or fly into deep space. Try all directions – get the feel of those controls. Keep sharp. The enemy is on its way!

The Enemy Approaches.

Train your eye to watch the Radar Screen. You can see the enemy's approach in advance. Your enemy looks like blips on the Radar Screen. But the real battle doesn't begin until the enemy enters the white frame in the middle of the screen. Beware! When the enemy enters the white frame, it can fire at you. Fire back!

Cloak and Danger.

Caution! The aliens have devised a clever cloaking device that renders some ships invisible! Watch those blips on the Radar Screen. As they approach you Battlestar in the white frame, some may switch on the device and shed their visibility!

Attack!

Put up your shields or eliminate all enemies in the Cockpit Window with your Doomsday Device. But remember – you have only four Doomsday Devices and four Shields. Save them for the right moment. Hold the enemy off with laser bullets as long as you can!

Bombers.

Here comes the enemy and it's looking for you: Bombers attack in formation. Beware! They like nothing more than to overlap so you can't see how many there are. Wait until a group enters the Cockpit Window, then hit the Doomsday Device to knock them out all at once.

Quirky Quarks!

A "Yellow Alert" might occasionally flash on the screen. This is no idle warning! Invisible enemies hover nearby: They're the silent Quarks, the unseen alien force that tests you and toys with your nerves. Keep your eyes sharp, Cadet!

Cache on the line.

Those silos on the planet's surface house your enemy's weaponry. Don't let the aliens near them! Protect the planet with the techniques you've learned. This is no textbook exercise, Cadet!

Dauntless and Dawdle-less.

Don't dawdle. The longer you wait to eliminate the enemy squadron, the worse your situation can become. Starships attack. Shuttles dart in. Be quick and get them all!

Warning: Low Fuel!

When the low fuel warning sounds, you have only a few moments to save yourself. Dive to a fuel depot and fill up. If you delay, the Red Alert sounds. You can't move! Enemies attack in groups. Fire! Only by eliminating the squadron can you survive.

Rockets and Laser Bases.

Those docile-looking Rockets and Laser Bases can be deadly enemies. Approach a Rocket and it fires away. Get near a Laser Base and it can blast your Battlestar to smithereens. You can eliminate the Rocket, but it's not part of the active enemy squadron. Avoid the Laser Bases. There's no way to knock them out!

Unseen, unheard, unknown.

As you eliminate enemy squadrons, you prevent the cloaked Quarks from materializing. Collect your reward in Bonus Points. The more squadrons you eliminate, the greater your point gain!

Move up, move on.

If you're good, you'll not remain a Cadet forever. The greater your success, the better your change for moving up in command. Start out as Cadet, then move up to Flier, followed by Squadron Leader, Wing Commander, and finally Ace!

Space Flier.

Your battle is not over, Flier. Another squadron soon challenges your Battlestar. This time the enemy has called for Interceptors to

help them. They will succeed if you're not alert! The battle continues as you defend your ship, your squadron, and your honor.

Starting Over.

Press * to replay the VICTORY™ game option that you have just played. Or press # to go back to the Game Option screen.
